EDUCATION

Team Treehouse

2021 – 2022

Front End Web Development Techdegree

Learnt how to build interactive websites and powerful web applications using HTML, CSS, and JavaScript. Built 9 real world projects that are show cased on my portfolio website (www.mohammedseleman.com). Professional way of learning that exposes you to the fundamentals and best practices of web development.

Overall, each project submitted is marked either 'Meets Expectations' or 'Exceeds Expectations'. Exceeds Expectations being when you go over and beyond what was needed to simply pass the project and attempt work that really tests your developer skills. I'm proud to say that I achieved Exceeds Expectations on every single project.

Milton Keynes College

EXPERIENCE

TSYS

Milton Keynes

Sainsbury's Bank - Fraud Analyst

Sep 2018 - Jan 2021

As part of Sainsbury's bank fraud team at TSYS, it is my responsibility to prevent fraudulent activity and minimize fraud losses by identifying and reporting abusive patterns and trends. This involves working as part of a team, contacting customers to establish authenticity of transaction protocol, using effective communication to deal with card holders whilst analyzing data under pressure. Collate update and maintaining departmental record/database to ensure client and customer requirements are met.

Key Responsibilities

- Investigating suspicious activity and making an informed decision on whether there is 1st or 3rd party compromises.
- Minimizing financial loss position as well as being proactive in the recovery of funds for scams related disputes.
- Answering queries and providing helpful and accurate advice to clients and customers on fraud and scam related queries through a variety of channels.
- Contacting customers to establish the authenticity of transactions, following correct internal procedure.

Key Achievements

- The first ever employee to score 100% in final accreditation.
- Promoted in 4 months.
